A Social Enterprise in Waste Management
THE CHALLENGE

1000 TONS
of solid waste generated per day in Kathmandu Valley.

More landfills
as waste volume is expected to double by 2025.

'Out of this, a large quantity is recyclable if segregated at source'
THE CHALLENGE
THE CHALLENGE

Lack of awareness
THE CHALLENGE

Lack of awareness

Waste segregation at source is not practiced
THE CHALLENGE

- Lack of awareness
- Waste segregation at source is not practiced
- Inadequate planning. No systems to manage E-Waste, Medical & Hazardous Waste
THE CHALLENGE

- Lack of awareness
- Waste segregation at source is not practiced
- Inadequate planning. No systems to manage E-Waste, Medical & Hazardous Waste
- Lack of capable and reliable private parties
THE CHALLENGE

Lack of awareness
Waste segregation at source is not practiced
Inadequate planning. No systems to manage E-Waste, Medical & Hazardous Waste
Lack of capable and reliable private parties
Lack of Policy Implementation
17000 TONNES of electronic waste is produced just in Kathmandu Valley each year.

No mechanism exists in the state to collect, transport, dismantle and dispose e-waste.
INCREASING CONSUMERISM

Rise in Single Use Plastics

- Plastic Bags
- Disposable Items
- Bottles
- Food Wrappers
- Tobacco Products
- Parcels

Landfill | Burning | Dumping | Littering
Mostly Non-Recyclable or Difficult to Recycle
